

EXCITEMENT AT ALTA

Forcible Ejection Takes Place at the Grizzley.

H. C. WALLACE EVICTED

REPORTED HE WAS MINING REGULATOR ORE.

Word reached town from Alta yesterday that the old camp was in a state of considerable excitement through trouble which had just broken out between the new Regulator company and H. C. Wallace as lessee at the old Grizzley mining company's property. Particulars were hard to obtain, as the gentleman from whom the information came simply telephoned to his partner here that Mr. Wallace had been driven off the Grizzley ground at the point of a gun, the informant being a sub-leaser under Mr. Wallace.

From what information could be learned on this end of the line, it appears that the Regulator company has recently made a survey of its ground and found that a portion of the old Grizzley workings were beyond the limits of its own territory and within the boundaries of the Regulator's lines. It is understood that the men working there as well as Mr. Wallace were ordered to vacate, and upon the latter's appearance on the ground Monday he was forcibly ejected, the proceeding having been taken at the direction of Mr. G. W. Moyer of counsel for the Regulator company, who was at the property, and who is expected to be here this evening. Whether this is the exact condition of affairs will probably be known, therefore, tonight. But the ejection of Mr. Wallace was forcibly accomplished there appears to be no doubt, though the reason may prove to be erroneous.

The Grizzley is one of the oldest mines in Alta, and as Mr. Wallace has been familiar with its location for thirty years or more, it seems almost impossible that he could be contending for territory that did not rightfully belong to him. It is, however, a fact that he holds his lease, while on the other hand it is claimed that the Regulator people are absolutely sure that ore is being taken from their ground through Grizzley workings, so a fight in the courts may result.

Alta is coming to the front rapidly, and it is expected that the character of the fight to crop out often it will not be long till the camp takes on some of the rough and ready life of the early '70s, when gun plays were of almost daily occurrence and killings frequent.

OFF FOR MEXICO.

Jack Quinn, of Park City, Goes to Sonora.

Jack Quinn, one of the lessees of the old upper workings of the Daly mine, Park City, came down from camp last night and tomorrow will leave for Sonora, Mexico, where he is to take the employ of the Montezuma Copper Mining company, a big eastern combination, in which he is now engaged in erecting smelters and opening up the mine.

Mr. Quinn goes down to superintend the running of a big 6,000-foot tunnel which is designed to open the mine at great depth, and should he find the country and the situation to his liking, he will probably remain with the company after the tunnel, which is now well under way, is completed. Mr. Quinn's interests in the Daly lease will be looked after by James McDonald. Jack is a very popular man, with a host of friends both here and in Park City who will wish him all kinds of success in his new field. The Herald's informant of health have much to do with his going.

HERCULES HAS IT BIG.

The Same Vein Paid Well In the Honorable Years Ago.

It was learned yesterday from a gentleman who knows the ground probably better than any man in the state, that the recent strike in the Hercules at Stockton is a particularly fine specimen of the chert encountered in that mine is one and the same as what is known as No. 5 cross-ledge in the Honorable and where it was paid for in the Hercules only some 300 or 350 feet north, from the former mine's old workings.

It is the fact that the Honorable, which Messrs. Scheu and associates are now preparing to go down 100 feet below the water level in the Honorable and will find something like 400 feet of stopping area above the tunnel level. An immense amount of money was taken out of that vein by the Honorable in early days and The Herald's informant says there is no question but what the Hercules will find it just as good in its territory.

LEASERS MAKING GOOD MONEY.

On Ground Thought to Be In Dispute at Alta.

H. Stewart and associates are or have been making good money on the lease of old slope fillings in the upper workings of the Grizzley mine at Alta. The statement that they are making good money is qualified because the chances are that the trouble between the Regulator and Grizzley has thrown them out of a job as far as that particular mine is concerned. During last month the assessors took and signed enough on to pay for their plant, together with the bringing of water to it, and pocket a nice piece of money besides.

If they are permitted to go on till winter closes in, they will pile up a nice sum with which to open up other ground in the camp in which they are interested.

One of the boys interested stated yesterday that if they are compelled to quit the Grizzley he thinks they can go to work at another point which will probably pay them as well, but they feel pretty badly broken at the prospect of having to move this late in the season.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, including \$4,600, from the Commercial National bank and Bamberger & McMillan, respectively, which should have been reported yesterday morning, amounted to \$104,950, as follows:

T. R. Jones & Co., ores, \$25,600; bullion, \$39,000.
McCormick & Co., Mingo bullion, \$4,100; ores, \$5,100.
Commercial National bank, ores, \$9,000; bullion, \$31,450.

Metal Market.

Silver, 62 1/2 per ounce.
Copper, 15 1/2 per pound.
Lead, A. & B. Co.'s price, \$4; New York exchange, \$4.37 1/2; New York brokers, \$4.

Mining Notes.

The Centennial-Eureka company sold twelve cars of copper ore yesterday. The Ophir Hill company had six cars of concentrates on yesterday's market. The Taylor & Brunton sampler yesterday received six cars of ore from Stockton.

Manager G. A. Duncan of the Overland returned from a business trip east yesterday. J. O. Parsons, the well known mining man, who was formerly superintendent of the Dexter, at Tuscara, is

back from Cape Nome. Like the great majority, he brands it as a failure.

Secretary M. C. Morris of the Bullion-Beck company was out at Tintic inspecting the mine yesterday.

Quite a party of Ogden and Salt Lake gentlemen are booked for a visit to the Yankee Consolidated today.

Anchor mill, Park City, came down yesterday for a short breathing spell.

Judge Thomas Cupit returned to the Park this morning, after spending a couple of days in town on mining business.

Bert Cohen, the accommodating accountant at Bamberger & McMillan's, returned from a pleasant ten days' visit with friends in Intuit.

Manager P. T. Farnsworth returned from the Horn Silver mine yesterday morning. He reports the property to be looking well, particularly on the lower levels.

Superintendent Ball of the Lower Mammoth telephoned in yesterday that the mine has been closed between the 600 and 700 level in the mine. As soon as the mine is cleaned up the mine will be opened.

Josiah Osborne, superintendent at the Horn Silver mine, a position he has held for the past eighteen years, came up from the mine yesterday and left for Blackfoot, Idaho, where he will return to Frisco the latter part of the week.

Warning to the Public.

Before buying Buckeye Mining company stock, verify same by telephoning to the company. There are thousands of shares of illegally issued stock out.

BUCKEYE MINING COMPANY.

Weekly Crop Bulletin.

Section Director L. H. Murdoch of the weather bureau has issued the following bulletin for the week ending Sept. 10:

"The mean temperature for the northern half of the state was about five degrees above normal, while that for the southern half was very close to the normal. No injurious frosts occurred. Showers, too light to be of much service, fell over the state on the 9th and 10th. The showers which fell on the 2d and 3d were quite heavy over Sanpete, Sevier, Emery, Grand, and Garfield counties and have greatly improved the ranges. The week was very windy. In most sections the ground is still too dry for plowing and sowing. The corn crop is well along in parts of Cache and Weber counties and is ready for cutting. The cutting, shocking and hauling of corn is still in progress. In some localities sugar beets are ready for digging. Potatoes have matured nicely and some of them are being dug. Threshing is generally completed. There is an excellent crop of wheat.

Real Estate Transactions.

J. S. Risley to Peter Peterson, part of southeast quarter section 11, township 2 south, range 1 west, \$1,500.

L. C. Risley to Peter Peterson, part of southeast corner lot 1, block 1, plat 1, \$25.
Mary Jeremy to J. A. Cederquist, 52x20 rods northeast from southwest corner lot 2, block 12, plat 1, \$1,250.
Frank Beckstead to Ruth A. Beckstead, 40x10 rods northeast from southeast corner northeast quarter section 10, township 3 south, range 1 west, \$2,000.

RAGTIME DYING OUT.

Once Popular Form of Romp Shows Signs of Decadence.

(Chicago Times-Herald.)
Rag time has seen its best days, and this particular form of musical gymnastics is slowly dying out. Dancing instructors have put the ban on rag time, and it has been their way that the ball room will no longer serve as a scene of ridiculous cake walks. The American Social professors of dancing, assembled in convention at Saratoga, has of late, tabooed the cake walk, and next winter it will not monopolize entire programmes.

There will be a return to old-fashioned music, the dancing professors say, and dancing itself will be more like the stately and graceful style of former years. Instead of the wild romp that syncretized the music of the past, the new step will be danced in quiet, dignified style, and the once honored glide step will again come into vogue. As an indication of the fast approaching death of rag time is found in the theatres and variety houses. Concert acts are no longer thrust before the public on every conceivable pretext, and the cake walk no longer brings spasms of delight to long-suffering audiences.

Dancing instructors are delighted at the fact that their representatives at the Saratoga convention have frowned on rag time. They have all along contended that the dignity of the dance had suffered with the advent of rag time, and now they are glad to see indications of a return to older and better things.

Russia's Way of Raising Money.

(Vienna Flendenblatt.)
The recent increase in Russia of all duties on imported goods is destined to pay for the Chinese expedition. This Russia defrays the expense of the alliance war with Germany and Italy. Perhaps the goods of America, Italy, France, and the high duties will still remain when the last boxer has yielded to the international force. So Russia will be a winner, anyway. Wise Mr. Witte.

ARITHMETIC AND FOOD.

School Children Must Be Better Fed.
A young girl in Newport, Ind., Miss Ethel Thornton, says no one has a better right to speak of Grape-Nuts food than she. "I was in school, but in poor health until Mamma began to give me Grape-Nuts food. I began to improve at once, both mentally and physically, and I improved so in my work at school that I got 100 in arithmetic, and during that time I gained three or four pounds in weight and am still gaining."

It is well for parents to know that Grape-Nuts food contains selected elements from the grains, prepared and cooked in such a way as to present these food elements so that they can be quickly digested and assimilated; the phosphate of potash obtained in Grape-Nuts unites with the albumen of food to quickly rebuild the gray matter in the nerve centers and brain.

It is of the greatest importance that growing children get 100 in arithmetic, and that the food that sustains both brain and nerves.

MINING STOCK MARKET

Star Consolidated Made Things Lively Yesterday.

NORTHERN LIGHT UP

MAY DAY AND YANKEE WERE BOTH STRONG.

Star Consolidated supplied the chief attraction at yesterday's call on the stock exchange, with Northern Light a close second. Buyer and seller were not long in getting together when Star was called, and before the gavel fell for the last time 5,000 shares had been passed out at prices ranging from 50c to 54 1/2c, the last sale being made at 54 1/2c.

Northern Light made another good start and sold 3,000 shares, commencing at 45c and winding up at 54c. Yankee Consolidated was also favored with a good demand at advanced prices, a total of 5,000 shares going at 19 1/2c to 20c a share.

May Day also did a nice business at prices ranging between 45c and 46c. Mammoth sold 200 at \$2.20 and Lower Mammoth hit 1,100 at 45 1/2c to 47c, while 1,572 shares of Joe Bowers were taken in at 14c, the day's total sales being 18,400 shares, of a selling value of \$5,770.72.

Daily dropped back to \$2.17 bid and asked to 10c, the price asked on each, however, being away up and transactions were recorded. On the closing of books for the dividend Daily-West went back to the following quotations:
